

SCE Distribution Infrastructure Improvement (Ventura)

Overview: Over the next 6 months, Southern California Edison (SCE) will be replacing power poles, electric wires and transformers in the neighborhoods along east Main St, Thompson, and Foster Ave. Some of these poles are in alleys and private homes' backyards in utility easements. Other utilities that may be affected include AT&T, Century Link, Charter, Level 3, Sprint, Time Warner, Verizon, since their facilities may be located on SCE power poles.

Work Schedule:

- All three phases will start Monday, August 8
- Completion will be by early December, 2016

Project Benefits:

- Increased safety
- Increased reliability
- Reduced outage durations

What to Expect:

- **Crews on your property.** Work crews may need access to rear property pole and boxes. We will attempt to notify you before entering.
- **Periodic traffic lane and sidewalk closures.** Crews will use traffic control signs and flags as a warning.
- **Intermittent power outages.** SCE will notify you at least 72 hours before a planned outage.

Work Hours and Safety:

- 7:00 A – 4:30 P, Mon-Sat, excluding city holidays
- **SAFETY FIRST:** Be sure that children are supervised and kept away from construction activities!

The Team:

- SCE will use Hotline Construction as the contractor to perform this work.
- Each service truck will be identified with SCE and Hotline logos.

Contact:

- Emergency or downed power line: **911**
- Customer Service: **800-655-4555**
- Business Services: **800-990-7783**
- Hotline Construction: **805-746-6906**
