Please call to confirm hours and quantities

WHAT IS HOUSEHOLD HAZARDOUS (TOXIC) WASTE?

Many household, yard and automotive products are considered hazardous materials that are too toxic to trash. Federal and State laws prohibit their disposal in the trash, flushed down the toilet or dumped down a stormdrain. These products are known to cause pollution to the environment and may be harmful to human health. The City of Ventura provides a FREE safe way to dispose of many of these products through a monthly Household Hazardous Waste (HHW) collection event. Some specific products may also be taken to alternate sites as designated in this brochure.

Federal Department of Transportation (DOT) regulations limit 15 gallons or 125 lbs. of material that can be legally transported per visit.

BEFORE YOU TRANSPORT

Asbestos: Must be soaked in water and then double-bagged. Transit pipe must be cut in sections no longer than two feet, soaked and double-bagged.

Medical Sharps: Hypodermic needles, pen needles, intravenous needles, lancets and other devices that are used to penetrate the skin for the delivery of medication will ONLY be accepted in an approved sharps container in compliance with State regulations.

MATERIALS ACCEPTED

AT THE MONTHLY HHW COLLECTION EVENT

Most of these items are now banned from California landfills and are dangerous to human health and the environment.

Bring these items to the event for safe disposal.
